1. Name of Organising Department : **Department of Library**
2. Name of Activity : Workshop on Information Search Techniques
3. No. of Participants : 87 Students
4. Date of Activity : 18<sup>th</sup> August, 2021

#### **Details of Activity (In Brief):**

In this workshop resource person Dr. Mohan Kherade, Director, Knowledge Resource Centre, SGBAU, Amravati gave the information about search techniques with the help of google. He defined information search techniques as standard mechanism for retrieving information from any information system. He gave information about Phrase searching, Boolean logic, Nested searches, Proximity, Truncation, Wildcard, Common Pitfalls.

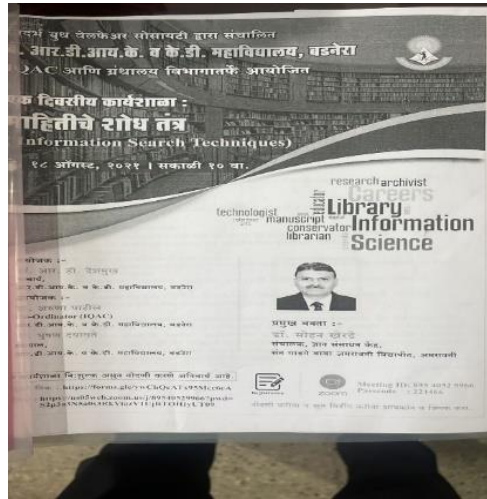

He also stated that searching for information has to be precise and thorough. Successful literature reviews are created from searches using well-chosen keywords and phrases over a broad range of resources. To conduct a precise and thorough search you may need to use a variety of techniques, from Boolean logic to truncation and proximity searching. Not every technique is supported by every resource, and the ways in which the techniques are used can differ, so always check the help available for each individual resource. If your search is continued over a long time, you might find it helpful to keep a diary or journal. This can help trace changes in the direction of your research, and record useful search strategies, keywords and phrases. He also guided about how to search appropriate information and how to avoid irrelevant information with the help of specific example and PPT. He also stated that it is very important to select appropriate information from huge collection. He also taught how to save information from google.

#### **Outcome of the Programme:**

- Programme helped to identify appropriate search terms for topic or research question.
- Programme also motivated to develop search terms into an effective strategy using standard search techniques.
- Programme encouraged students to evaluate search results.
- This workshop cleared the idea about how to select appropriate information from the range of results retrieved for the research topic.
- This programme helped in reading, selecting, analysing and synthesizing information from a range of sources.
