Leprosy, also known as Hansen's disease (HD), is a long-term infection by the bacteria Mycobacterium leprae or Mycobacterium lepromatosis. Infection can lead to damage of the nerves, respiratory tract, skin, and eyes. India is running leprosy eradication programs, the National Leprosy Eradication Program (NLEP) for so many years. Despite this, 120,000 to 130,000 new cases of leprosy are reported every year in India. This is 58.8% of the global total of new cases. This run was organised with the aim to create awareness against the stigma attached to the disease, by making the general community aware that it is a disease spread by a type of bacteria and it can be easily cured. All over the world, people have incorrect and harmful beliefs about leprosy. These beliefs are based on myths and they lead to discrimination against people affected by leprosy. They cause people to hide their symptoms and delay treatment. Superstition like this disease is curse, the result of sin, or punishment from God. You shouldn't touch to leprosy patient because it's highly contagious. Leprosy is incurable Etc. to Eradicate such superstitions from the minds of people and to reduce the rate and eradicate this disease such programs are undertaken by the health mission run by State Government. R.D.I.K. college, Badnera in collaboration with department of health service (Leprosy) Amravati organized "**Run for Leprosy**" of 5 km. on 12th February 2023. Along with 34 students of our college, Men and women of all age groups from the district run participated in. Deshmukh Principal R.D.I.K. college, Badnera, Amravati were present as the chief guests of the program. Total 252 people participated in this event. 53 men and 139 women participated in this run. After the run all the participants were given information about leprosy and about the habits one should inculcate in their day-to-day life to prevent this disease and the measures one should take to cure this disease. The Caps with health mission logo on it were distributed among the people.

Outcome of program.

Details of Activity (In Brief):

Women Empowerment Cell and Unicare Health Care centre, Nashik jointly organised a workshop for college girls on 19/10/2022. Title of the workshop was ‘Thyroid and Hormonal Imbalance in Women’ with subthemes causes, symptoms, treatment and precautions. Mrs. B.S.Vidhale, Co-ordinator of Women Cell and Mr. Swapnil Visute Naturopath from Unicare Health Care Centre, Nashik discussed the topic in detail.

Thyroid problems in Women occur when thyroid makes too much or too little hormone. This is called hyperthyroidism or hypothyroidism. This leads to speed up or slow down heart rate. Iodine deficiency and auto immune diseases are the main causes of thyroid.

Common symptoms of thyroid in women are fatigue, weight gain, constipation, hair loss and skin dryness. If this happens, women should take preventive treatment for this.

The guest speaker talked about the treatment of thyroid also. Medicine, Radio iodine and surgery are the main treatments for female thyroid problems. Antithyroid medicines block the thyroid cells and surgery removes most or all of the thyroid cell.

While talking about precautions, he asked women to visit the doctor, make regular thyroid test, not to smoke, eat less soy, ask for a thyroid callar during X-rays to protect thyroid glands from radiation exposure.

The speaker also answered to queries raised by students.

Outcome of the Programme:

1. Girls understood the exact meaning of thyroid glands and thyroid disorder.
2. Students learned about the ways to protect themselves from thyroid problem.
3. Students became health conscious as well as diet conscious.

1. Name of Organising Department : **Department of Library**
2. Name of Activity : Workshop on Information Search Techniques
3. No. of Participants : 87 Students
4. Date of Activity : 18th August, 2021

Details of Activity (In Brief):

In this workshop resource person Dr. Mohan Kherade, Director, Knowledge Resource Centre, SGBAU, Amravati gave the information about search techniques with the help of google. He defined information search techniques as standard mechanism for retrieving information from any information system. He gave information about Phrase searching, Boolean logic, Nested searches, Proximity, Truncation, Wildcard, Common Pitfalls.

He also stated that searching for information has to be precise and thorough. Successful literature reviews are created from searches using well-chosen keywords and phrases over a broad range of resources. To conduct a precise and thorough search you may need to use a variety of techniques, from Boolean logic to truncation and proximity searching. Not every technique is supported by every resource, and the ways in which the techniques are used can differ, so always check the help available for each individual resource. If your search is continued over a long time, you might find it helpful to keep a diary or journal. This can help trace changes in the direction of your research, and record useful search strategies, keywords and phrases. He also guided about how to search appropriate information and how to avoid irrelevant information with the help of specific example and PPT. He also stated that it is very important to select appropriate information from huge collection. He also taught how to save information from google.

Outcome of the Programme:

- Programme helped to identify appropriate search terms for topic or research question.
- Programme also motivated to develop search terms into an effective strategy using standard search techniques.
- Programme encouraged students to evaluate search results.
- This workshop cleared the idea about how to select appropriate information from the range of results retrieved for the research topic.
- This programme helped in reading, selecting, analysing and synthesizing information from a range of sources.

Water pollution refers to the contamination of bodies of water, such as rivers, lakes, oceans, and groundwater by harmful substances. These substances can include pollutants like chemicals, sewage, industrial waste, and microorganisms. Water pollution has detrimental effects on aquatic ecosystems, wildlife, and human health, making it a significant environmental concern. It can lead to reduced water quality, harm aquatic life, and pose health risks for those who rely on polluted water sources for drinking or other purposes.

Discussion Highlights:

The discussion began with an overview of water pollution, its causes, and consequences.

Group A and Group B identified various sources of water pollution, including industrial discharge, agricultural runoff, and improper waste disposal.

Participants discussed the devastating effects of water pollution on aquatic ecosystems, wildlife, and human health.

Students shared specific examples of water pollution incidents, demonstrating the real-world implications of the issue.

Both groups brainstormed potential solutions, such as stricter regulations, improved waste treatment, and public awareness campaigns.

Outcome of the program:

The group discussion among B.Sc.II&B.Sc.III students on water pollution was a productive and enlightening exchange of ideas. It served as an effective platform for raising awareness about the critical issue of water pollution. During the discussion, participants demonstrated a deep understanding of the causes, consequences, and potential solutions related to water pollution.

2. Name of Activity : Distribution of Guppyfish (Mosquito Fish)
3. No. of Participants : Students- 10, Teachers-02, Other-03
4. Date of Activity : 25th March, 2022

Details of Activity (In Brief):

Gambusia fish culture project is being run by zoology department since 2001. Our college is an authorized center for Anti malaria fish *Gambusia* (Guppy masa) Governed by District malaria Department (Urban only) and Amravati Municipal Corporation since the year 2001. It comes under the jurisdiction of Urban Health post Modi Hospital Badnera. These fishes help to control the diseases like malaria, dengue and chicken gunya.

The malaria department often takes the *Gambusia* fish from our college tank for distribution in malaria prone regions. Zoology department also provides the fish to people like govt. Modi hospital or students who approach to the department.

Outcome of the program:

- 1) By distributing Guppy fish to students and the local community, there is a positive impact on mosquito, control. Guppy fish are known for their effective consumption of mosquito larvae, reducing the mosquito population in the area. These fishes help to control the diseases like malaria, dengue and chicken gunya.
- 2) Students got opportunity to learn about responsible fish care and the maintenance of an aquatic ecosystem. This hands-on experience fosters a greater understanding of environmental stewardship, involving the local society in this eco-friendly initiative promotes community engagement and awareness about the importance of maintaining a healthy environment.

Details of Activity:

Department of Botany Organized the field visit cum Extension activity at Belora Village B.Sc. I and B.Sc. II years Students dated 27/04/2022. At Belora village department has distributed Day Night Oxygen giving Plants to the people. Students gave the information about oxygen giving plants to the village people. Villagers gave very good response to the activity. For the activity Dr. R. D. Deshmukh Principal motivated to the students. Head department of Botany Dr.S. B.Thorat along with Mr. Vaishali Ingale and Mr. Devanand Shende were escorted the students. Activity was taken in the pandemic COVID- 19 period. It becomes helpful to know about the indoor oxygen producing plants like

- 1) Money plant 2) Aloe Vera 3) Snake plant 4) Tulsi plant 5) Peepal tree 6) Areca palm plant 7) Gerbera plant 8) Christmas tree 9) Neem Plant 10) Bamboo plant 11) Ficus plant

They discussed plants release oxygen at night and consume carbon dioxide, creating a very convenient environment for us humans to breathe it. Many plants are found to supply usually during day, whereas this process gets reversed at night. Some popular plants that give oxygen 24×7×365 days. Students took a look at these green beauties and ask villagers to start planting them around themselves.

From the above plant list students gives the detailed information to the peoples of Belora village.

1) **Snake plant:** *Dracaena trifasciata*

It is a straight upright plant that grows up to 3 feet. It is said to absorb carbon dioxide from the air as well as to clean formaldehyde from the air. It is easy to grow as it doesn't need to be watered regularly.

2) **Areca Palm:** *Dypsis lutescens*

Goes by the name golden palm, butterfly palm and yellow palm. It can be early planted in full sun but it prefers provide shade. It releases oxygen and increasing its

level in the area where it is kept, also filters pollutants like xylene, toluene and formaldehyde.

3) Aloe vera plant:

Known to remove toxins from the air like aldehydes and benzene. It release oxygen during day as well as night. They have pointed leaves with white transparent gel. It also has a medicinal property and used for multiple treatment like /minor burns, psoriasis, constipation, diabetes etc. over watering can be its root, whereas it prefers a sunny atmosphere.

4) Money plant: *Epipremnum aureum*

This plant help remove Benzene, toluene, xylene and formaldehyde. Student said that this plant help improve the oxygen from the air.

5) Gerbera plant: *Gerbera jamesonii*

Gerbera is a flowering plant species that known for its oxygen releasing properties at night. It is benefitted to people who suffer from sleep and breathing disorder. It needs sunlight in its flowering season. The Gerbera plant can survive for more than two years.

6) Tulsi: *Oscimum sanctum*:

It is used to treat asthma, cold, sore throat, high blood pressure and cholesterol. It is an excellent stress relaxant and inflammation controller. Tulsi is easily available in each and every house and can be used by the people. It also absorbs harmful gases like carbon monoxide, carbon dioxide and sulphur dioxide from the air.

7) Neem tree: *Azadirachta Indica*

Students focused on neem having antibacterial properties to purifying air around us. It acts as a natural pesticide and cure for many ailments. Its extracts are used in different hair care and dental products.

8) Peepal tree: *Ficus religiosa*

Gives oxygen at night too. In India the Peepal tree is considered one of the holy trees. Students give information about the Peepal tree that treat asthma, constipations, acts as a remedy for tooth decay, diabetes controller. This is sacred tree found in every village and cities. Also, the plant can keep improving the quality of air and provides oxygen at night. In late 2019, severe acute respiratory syndrome corona virus (SARS-Cov-2) emerged with a high transmission rate and severe effects on human health. Students introduced that in the air purification method indoor plants can purify the air by the removal of air pollutants and airborne microbes. The use of

airborne microbes. The use of indoor plants as a new possible eco-friendly tool for indoor air purification and for reducing the spread of Covid-19 in confined places.

The symptoms of COVID-19 are breathlessness. Students told that a lack of enough oxygen in your body can lead to fatal cardiovascular condition. Because of lockdown by government, many families stay at home, the air in these, enclosed spaces become more polluted than ever. Plants purifier and generate high oxygen level. In times of COVID-19 isolation and stress, plants make people happy and relieve all the stress, boost the immune system to fight against corona virus. Students and faculty distributed oxygen releasing plants at Belora village and request them to planting indoor plants in their homes.

Outcome of the Programs:

- Students increased the awareness about the plantation of oxygen giving plant
- Students implanted the importance of tree plantation for our health.
- People from village made aware people about biodiversity, deforestation.
- Students learned the various uses of plants and role of plants in air purification.
- Moral values like co-operation was inculcated in the student.
- They learned kindness, respect for the environment care for health and critical thinking.
- Students prepared for their determination to overcome through conditions and situations.

लघुउद्योगाकडे व व्यावसायिक क्षेत्राकडे लक्ष देवून ध्येयापर्यंत पोहचता येते.

या कार्यक्रमाचे अध्यक्ष महाविद्यालयाचे प्राचार्य डॉ.आर.डी. देशमुख यांनी विचार मांडताना स्पर्धा परीक्षा देण्याकरीता कौशल्य, सातत्य, तुपची पात्रता, तुपचे व्यक्तिमत्व, जीवनाल शिस्त हे गुण विद्यार्थ्यांनी जोपासावे. मग

यशाचे शिखर पाहता येते.

या कार्यक्रमाचे संचालन व प्रास्ताविक डॉ.व्ही.एस. भाकरे व आभार प्रा. आर.एन. खांडे यांनी केले. या कार्यक्रमाला उपस्थित प्रा. मोरे, डॉ. डाकूर, चव्हाण यांनी सहकार्य केले. कार्यक्रमाला विद्यार्थी, शिक्षक व शिक्षकेतर कर्मचारी मोठ्या संख्येने उपस्थित होते.
